PROJECT INFO

Project title	Curricula innovation in climate-smart urban development based on green and energy efficiency with the non-academic sector
Project acronym	SmartWB
Project reference number	101081724
Funding scheme	Lump sum grant - ERASMUS-EDU-2022-CBHE
Web address	www.smartwb.ucg.ac.me
Coordination institution	University of Montenegro
Project duration	36

DOCUMENT CONTROL SHEET

Work package	WP4: Creating a technological platform
Ref. no and title of activity	Task 4.3 Development of a technological platform for sharing experiences in CSUD
Title of deliverable	Report on the the technological platform for sharing experiences in CSUD
Lead institution	UET
Author(s)	Reni Ndreko, Agim Kasaj
Document status	Final
Document version and date	v.01 04. 07. 2024.
Dissemination level	Sensitive

VERSIONING AND CONTRIBUTION HISTORY

Version	Date	Revision description	Partner responsible
v.01	04. 07. 2024.	First draft	UET

This document provides main information about the technological platform designed as D4.3 “Development of a technological platform for sharing experiences in CSUD” of the SmartWB project funded by the European Commission's Erasmus+ Programme ERASMUS-EDU-2022-CBHE under grant agreement No 101081724.

The goal of the technological platform is to strongly support the SMARTWB project objectives, as described in WP4. It provides the tools for sharing experiences in climate-smart urban development (CSUD), strengthening the relevance of education for the labour market and society, enhancing relations between HEIs in Western Balkans partner countries, and establishing a technological platform for cooperation and exchange of knowledge. The platform is designed to facilitate cooperation, exchange of knowledge, experience, and good practices, modernising university courses in line with EU trends, and improving the competencies and skills of teaching staff.

The web links of technological platforms modules are:

<https://smartwb-eu.com/>

<https://moodle.smartwb-eu.com/>

The main components of the technological platforms are Forums, Job listing, E-Learning modules, etc. (Figures 1-5)

The platform is offered to the public at no additional cost. The principal actors will be the SmartWB project members, public institutions of the Western Balkan Countries, university students, and business partners of consortium members. The project will work hard to widen this network and increase the categories of actors included and their numbers. The more actors we include, the better the project reaches its goal and is of higher quality.

From the technical point of view, the platform is managed by the European University of Tirana (UET). However, all the consortium partners have the access needed to perform all their actions and tasks within the platform, with no restrictions. UET will support all of them in improving their intended tasks and train them if they need it.

Since the main goal of the platform is cooperation, collaboration, learning and information sharing, then a special focus is given to making it easy to share content to the social network with one click from each platform's user to their personal social networks, spreading the message to a much broader audience with no extra efforts.

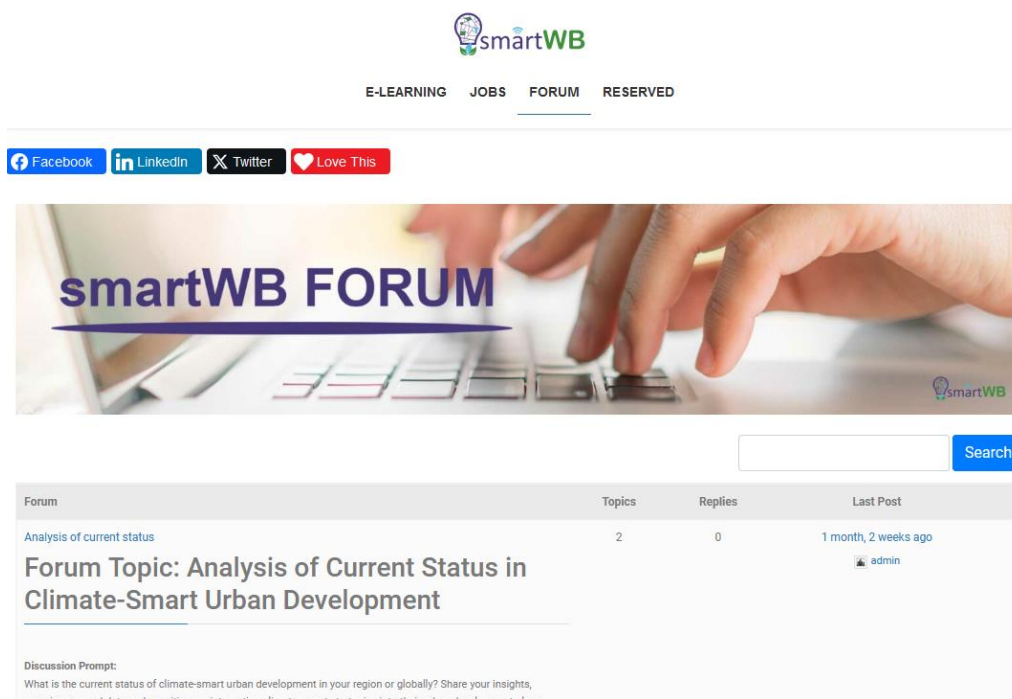

Figure: 1

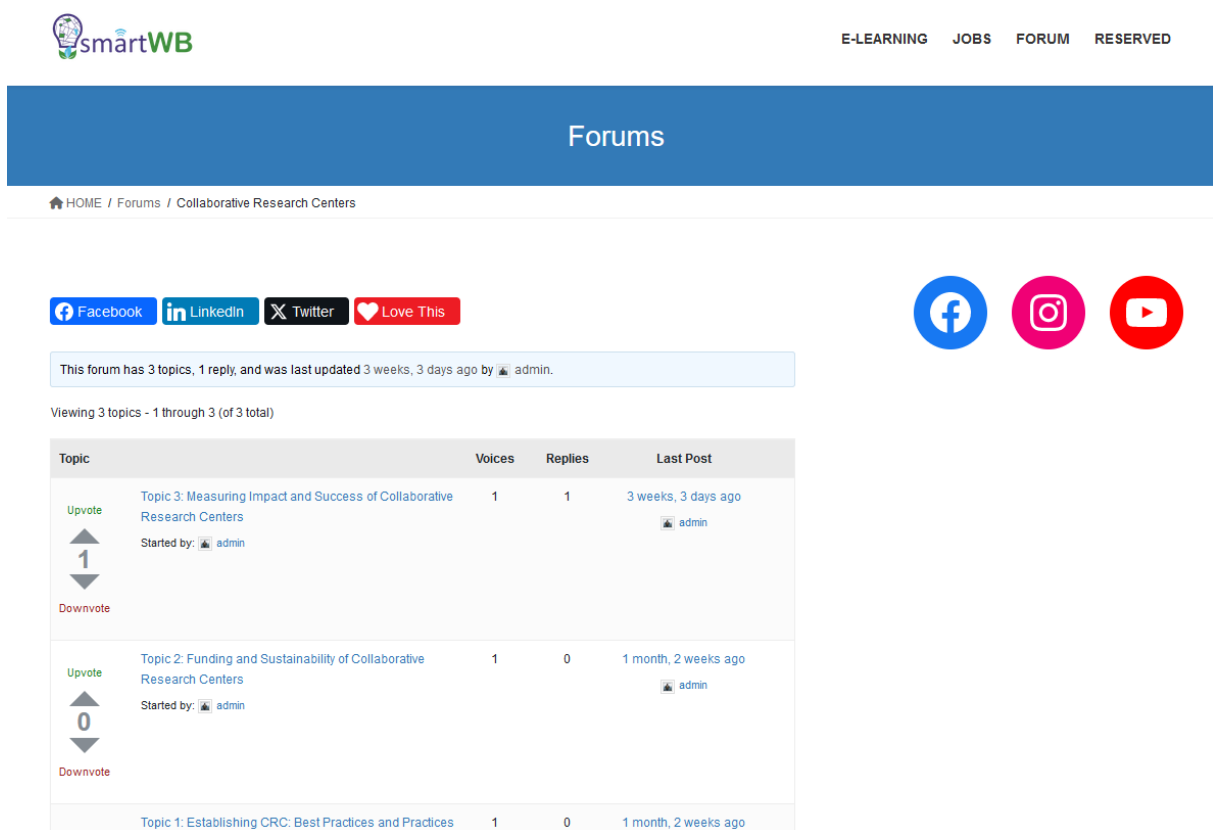

Figure: 2

Collaboration between consortium partners and their network of business partners is reinforced with platform features like ease job listings and searching (Fig.4), with private and public publishing options:

Figure: 4

Another strong point of the platform is the E-Learning module. It is a very advanced, modern a flexible solution for the Learning Management System (LMS), based on well knows MOODLE platform (Fig. 5).
